

Dimension

Features

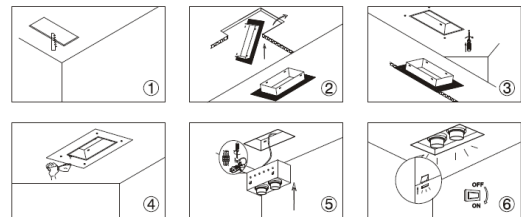

- DT-series is a trimless recessed luminaire featuring triple halogen luminaire MR-16 gimbals to provide accent lighting efficiently.
- Multiple selection of lamp wattages and degrees to choose from to provide different effects within the same luminaire.
- 30° tilt angle to maximize lighting range.
- Clean-cut design.
- Anti-glare baffle to reduce visual discomfort to the eye.
- Easy re-lamping system that provides user easy maintenance and convenience.

Applications

Designed for indoor applications, providing sleek and modern concept lighting. Smooth light distribution and rotationally symmetrical is perfect for lighting e.g. museums, exhibitions, showrooms and residences.
